 (FOR KEY SEE REVERSE)

In June 1954 the Shanghai Railway Bureau had initiated the use of telephone communications between the central office and the railway stations and section offices for such matters as passing of instructions and orders, reports on operations, and discussions of operations. The Shanghai system was patterned after the system practiced by the Chung Hsing (0022/5281) Railway while under the control of the U.S.S.R.

25X1

1. ☐ Comment. Chung Hsing is probably the new name for the former Chung Chang (0022/7022) Railway in Manchuria.
